How does Matchbook teach, reinforce, repair, protect, and improve culture every day?

CULTURE COMMITMENT

Students do not experience adult intentions. They experience adult routines, language, recognition, correction, repair, documentation, and follow-through. This manual defines the adult practices that make Matchbook culture visible and reliable.

HOW TO USE THIS MANUAL

This manual is written for campus adults. It is designed to be used during planning, coaching, team meetings, culture reviews, and real-time decision-making when students need support. It is not a philosophy statement and it is not a file inventory. It is the operating manual for the daily adult moves that create a safe, respectful, responsible culture.

The manual is organized by how culture works in the building: adults define the promise, teach the expectations, reinforce belonging, respond and repair when culture breaks, intensify support when students need more, and improve the system through coaching and data review.

PART	OPERATING QUESTION	WHAT ADULTS USE IT FOR
1. The Culture Promise	What does culture mean at Matchbook?	Use when making adult decisions, correcting behavior, coaching staff, and communicating shared expectations.
2. Teach the Culture	How do we teach expectations before correction?	Use for Culture Camp, First Five, Morning Meeting Culture Lab, common-space routines, and reteaching.
3. Reinforce Belonging and Identity	How do we make culture visible and social?	Use for LiveSchool, GiveThx, Houses, Cardinal Cash, VIP, Student of the Week, and Friday Cypher.
4. Respond and Repair	What do adults do when culture breaks down?	Use for in-class reset, supported reset, restorative support, repair, re-entry, family contact, and documentation.
5. Intensify Support and Protect Rights	What happens when students need more than universal supports?	Use for Tier 2, DBRC/CICO, Tier 3, FBA/BIP, attendance, wellness, safety, Title IX, and due process pathways.
6. Govern, Coach, and Improve	How do adults keep the system consistent?	Use for leadership cadence, culture meetings, coaching, data review, documentation QA, and annual maintenance.

MANUAL STANDARD

Use the least intensive effective support first. Escalate only when student need, safety, or instructional access requires a stronger response. Escalation is never a shortcut around teaching, relationship, regulation, family partnership, documentation, or repair.

Use the body of this manual for operating standards and adult procedures. Use the appendices for quick-reference tools, scripts, forms, and checklists.

CAMPUS OPERATING MAP

Matchbook culture is taught through daily practice, reinforced through belonging and recognition, strengthened through Houses and celebration, repaired through restorative response, protected through student support and required procedures, and improved through adult coaching and data review.

RESTORATIVE ANCHOR

Removal is not the intervention. The intervention is the sequence: notice, adult regulation, least-invasive prompt, reteach or reset, supported reset if needed, repair after regulation, re-entry, documentation, and pattern review.

SYSTEM MOVE	ADULT RESPONSIBILITY	PRIMARY EVIDENCE
Teach	Model, practice, rehearse, and reteach expectations in the setting where students must use them.	Routines practiced; students can state or demonstrate expectations; walkthrough data shows consistency.
Reinforce	Recognize behavior tied to Safe, Respectful, Responsible expectations and belonging.	LiveSchool points, GiveThx appreciation patterns, House participation, celebration evidence.
Repair	Respond to harm or disruption with dignity, regulation, accountability, and return-to-learning.	Repair notes, re-entry plans, family contact, successful return, reduced recurrence.
Protect	Escalate supports when students need more and preserve student rights, safety, and access.	Tier plans, DBRC/CICO data, attendance actions, safety/wellness routing, official documentation.
Improve	Review adult practice and student experience data to strengthen implementation.	Culture meeting decisions, coaching cycles, QA checks, equity audits, next actions.

PART 1

THE CULTURE PROMISE

PART PURPOSE

Define the adult standard that makes Safe, Respectful, and Responsible culture visible in every classroom, hallway, common space, family communication, and support decision.

Culture at Matchbook is not a discipline program. It is the shared adult operating system that helps students belong, learn, repair harm, lead, and remain connected to instruction. The promise is simple: students are taught what Safe, Respectful, and Responsible looks like; adults respond consistently; and the system protects dignity while maintaining high expectations.

◆ THIS PART CONTROLS:

- ◆ Safe, Respectful, Responsible language in adult decisions.
- ◆ Adult commitments during teaching, correction, support, and repair.
- ◆ Equity protections that prevent cultural, linguistic, disability, or trauma-related misreading.
- ◆ The shared expectation that culture is an adult system before it is a student outcome.

OPERATING STANDARD

Adults are responsible for the conditions students experience. When a pattern emerges, adults review the routine, adult response, setting, access, and relationship conditions before concluding the student is unwilling to meet expectations.

1.1 APPLY THE CULTURE PROMISE TO ADULT DECISIONS

This procedure gives adults a common decision rule so culture work remains consistent across classrooms, common spaces, support settings, and family communication.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use whenever an adult teaches, recognizes, redirects, repairs, supports, documents, or communicates about student culture.
Primary adult owner	Every campus adult; leaders coach and monitor for consistency.
Complete when	The student knows the next right step, the adult knows the follow-up, and any required record is complete.

◆ ADULT OPERATING SEQUENCE

- 1 Name the expectation using Safe, Respectful, or Responsible language.
- 2 Connect the expectation to the learning community rather than adult preference.
- 3 Teach or reteach the replacement behavior before relying on consequence.
- 4 Use the least intensive effective response first.
- 5 Protect the student from public shame, sarcasm, power struggles, or hallway processing.
- 6 Document significant support, repeated patterns, family communication, or safety concerns in the appropriate system.
- 7 Review patterns for adult practice as well as student behavior.

◆ STUDENT EXPERIENCE

Students hear consistent language across spaces and understand that adult responses are connected to taught expectations, not personal irritation.

◆ FAMILY COMMUNICATION

Families receive factual, partnership-oriented communication connected to the expectation and the support being provided.

◆ DOCUMENTATION

Significant events, patterns, family contacts, and interventions are documented in the appropriate system. Recognition and behavior evidence may be tracked in culture platforms; official records follow required systems.

EQUITY CHECK

Adults do not treat dialect, processing time, disability-related behavior, trauma response, cultural communication style, or language acquisition as automatic disrespect.

1.2 PROTECT DIGNITY DURING CORRECTION

Correction is part of teaching. It should be clear enough to protect learning and quiet enough to preserve dignity.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use whenever an adult must interrupt behavior, redirect a routine, or respond to a student who is not meeting an expectation.
Primary adult owner	The adult closest to the moment.
Complete when	The student is back in the routine or connected to the next appropriate support.

DECISION RULE

Adult language should get shorter as escalation increases. Long explanations are for calm moments, not dysregulated moments.

◆ ADULT OPERATING SEQUENCE

- 1 Regulate your face, posture, voice, and pace before speaking.
- 2 Use proximity, signal, or a brief private cue before public correction when appropriate.
- 3 Name the routine or expectation rather than labeling the student.
- 4 Give one clear next step and allow time for processing.
- 5 Walk away when the student has a path back to the routine unless safety requires continued support.

- 6
- Return with positive narration or a brief relationship repair once the student is back in the routine.

◆ STUDENT EXPERIENCE

Students experience correction as guidance back into the community rather than a public judgment of their character.

◆ FAMILY COMMUNICATION

Family communication is not required for isolated redirection. If a pattern emerges, contact the family with support language and a clear next step.

◆ DOCUMENTATION

Routine correction is not documented unless a pattern, intervention, or safety concern requires it.

EQUITY CHECK

Adults monitor whether certain students receive public correction more often than peers and adjust adult practice accordingly.

1.3 USE EQUITY AS AN OPERATING PRACTICE

Equity is not an add-on to culture. It is how adults ensure expectations are taught, interpreted, reinforced, and repaired fairly across student identities and developmental needs.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use during routine design, recognition, correction, support decisions, data review, family communication, and escalation decisions.
Primary adult owner	Every adult owns daily equity; leaders own monitoring and correction of patterns.
Complete when	The adult response is aligned to the taught expectation, student need, and required supports.

◆ ADULT OPERATING SEQUENCE

- 1 Teach expectations with visuals, examples, non-examples, gestures, practice, and grade-band language.
- 2 Check whether the student understood the expectation before assigning intent.
- 3 Separate behavior impact from assumptions about motivation.
- 4 Use language support and nonverbal participation options for multilingual learners.
- 5 Consult IEP, 504, behavior, and wellness information when legally or educationally relevant.
- 6 Review recognition, correction, referral, exclusion, and invisibility patterns by group and setting.

◆ STUDENT EXPERIENCE

Students experience high expectations with meaningful access. They are not punished for failing to infer expectations that adults did not teach clearly.

◆ FAMILY COMMUNICATION

Family communication avoids deficit language and includes what the school has taught, observed, tried, and will do next.

◆ DOCUMENTATION

Equity concerns and disproportionality patterns are reviewed through culture data and team meetings.

EQUITY CHECK

Recognition cannot privilege only loud, compliant, already-visible students. The system must notice growth, repair, self-regulation, leadership, help-seeking, peer support, and contribution.

1.4 USE THE SHARED ADULT LANGUAGE

Shared language makes the culture portable. Students should hear the same expectations and repair language from different adults and in different settings.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use during teaching, recognition, correction, Morning Meeting, common-space supervision, family communication, and re-entry.
Primary adult owner	All adults; leaders calibrate language during coaching and meetings.
Complete when	The adult message names the expectation, the next step, and the support without adding unnecessary judgment.

◆ ADULT OPERATING SEQUENCE

- 1 Use Safe, Respectful, Responsible as the main vocabulary.
- 2 Frame expectations as observable actions: what students do, say, carry, choose, repair, or complete.
- 3 Use a brief cue in the moment and a longer teaching conversation only after regulation.
- 4 Avoid coded or vague phrases such as attitude, disrespectful, defiant, lazy, or bad choice unless paired with observable facts.
- 5 Use the same language in family communication so families understand the expectation and support.

◆ STUDENT EXPERIENCE

Students can predict what adults mean and can transfer expectations across settings.

◆ FAMILY COMMUNICATION

Families hear clear, factual language that supports partnership instead of blame.

◆ DOCUMENTATION

Documentation uses observable language and avoids labels, diagnoses, speculation, or emotional wording.

EQUITY CHECK

Adults check whether language patterns differ across race, gender, disability, language, or grade band.

PART 2

TEACH THE CULTURE

PART PURPOSE

Establish how adults explicitly teach, model, rehearse, and reteach expectations before correction is needed.

Students should not have to guess what success looks like at Matchbook. Adults teach culture the same way they teach academics: with models, practice, feedback, reteaching, checks for understanding, and repeated opportunities to succeed in the real setting.

◆ THIS PART CONTROLS:

- ◆ Culture Camp and the opening launch of schoolwide expectations.
- ◆ First Five and daily openings that regulate rooms before instruction begins.
- ◆ Morning Meeting Culture Lab as daily rehearsal for regulation, language, belonging, and repair.
- ◆ Classroom and common-space routines, including arrival, hallway, restroom, cafeteria, recess, assembly, dismissal, and transitions.
- ◆ Reteaching when data shows the routine has not yet become reliable.

OPERATING STANDARD

Correction should not be the first time a student learns the expectation. When a routine is not visible, adults reteach the routine before treating the behavior as refusal.

21 LAUNCH EXPECTATIONS THROUGH CULTURE CAMP

Culture Camp launches the year by teaching values, routines, spaces, relationships, regulation tools, recognition systems, and repair expectations before the school day reaches full pressure.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use at the beginning of the school year, when a new cohort enters, after extended breaks, or when a campus reset is needed.
Primary adult owner	Leadership owns the launch; teachers teach lessons; all staff model and reinforce in real spaces.
Complete when	Each grade band has practiced the core routines and adults know which routines require follow-up.

◆ ADULT OPERATING SEQUENCE

- 1 Teach Safe, Respectful, Responsible as observable behaviors in each school setting.
- 2 Model what each routine looks and sounds like before asking students to perform it independently.
- 3 Practice routines in the actual spaces where they occur.
- 4 Introduce LiveSchool, Houses, recognition expectations, and celebration cycles.
- 5 Introduce GiveThx as a gratitude and belonging routine.
- 6 Teach reset tools and how students request support.
- 7 Teach repair language before conflict occurs.
- 8 Collect adult feedback on routines that require reteaching.

◆ STUDENT EXPERIENCE

Students experience culture as instruction, not as a list of rules announced once and enforced later.

◆ FAMILY COMMUNICATION

Families receive plain-language summaries of major expectations, recognition systems, and support routines.

◆ DOCUMENTATION

Leadership tracks completion of launch lessons and notes routines needing reteach.

EQUITY CHECK

Culture Camp must include visuals, movement, peer models, bilingual supports when available, and developmental language. Adults do not assume students arrive with the same school experiences.

2.2 RUN THE FIRST FIVE

The First Five creates a predictable opening routine that regulates the room, anchors belonging, and protects instructional time.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use at the beginning of the school day, class period, instructional block, or after a transition that requires reset.
Primary adult owner	Classroom teacher.
Complete when	The class is ready for instruction with minimal correction and clear access to the first task.

◆ ADULT OPERATING SEQUENCE

- 1 Greet students at the threshold, meeting area, or opening position.
- 2 Direct students to the first task, meeting location, or readiness routine.
- 3 Use a visual agenda, entry task, or quick readiness prompt.
- 4 Narrate the routine with brief language tied to Safe, Respectful, or Responsible.

- 5 Scan for access, regulation, and belonging needs before instruction begins.
- 6 Recognize sustained evidence once the routine is visible.
- 7 Begin instruction on time once the room is ready.

◆ STUDENT EXPERIENCE

Students know what to do first and how adults will help them enter learning without public embarrassment.

◆ FAMILY COMMUNICATION

Family contact is not required for normal routine teaching. Families may receive grade-level information during launch or reset periods.

◆ DOCUMENTATION

Routine documentation is not required unless a pattern, targeted support, or coaching need emerges.

EQUITY CHECK

The opening task must be accessible to multilingual learners and students with processing, executive-function, or regulation needs.

2.3 USE MORNING MEETING CULTURE LAB

Morning Meeting Culture Lab is the daily culture rehearsal where students practice regulation, values language, gratitude, repair, identity, and community habits before pressure arrives.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use during the daily Morning Meeting block and during grade-level culture resets.
Primary adult owner	Classroom teacher; grade leads and culture leadership provide materials and calibration.
Complete when	Students can state or demonstrate the focus and carry it into the learning day.

◆ ADULT OPERATING SEQUENCE

- 1 Begin with a consistent entry signal and meeting location.
- 2 Open with a brief regulation or grounding practice.
- 3 Preview the value, routine, expectation, or relationship skill for the day.
- 4 Use a short role-play, gratitude move, language stem, repair phrase, or scenario.
- 5 Connect the practice to the day's routines, LiveSchool, GiveThx, House identity, or Friday Cypher when appropriate.
- 6 Close with a clear transition into academics.

◆ STUDENT EXPERIENCE

Students rehearse the behaviors and language they will need before conflict, transition pressure, or social complexity occurs.

◆ FAMILY COMMUNICATION

Families may receive grade-band summaries of focus routines and language stems when helpful.

◆ DOCUMENTATION

Implementation is monitored through walkthroughs, team check-ins, and culture data trends.

EQUITY CHECK

Morning Meeting must include multiple participation modes: verbal, nonverbal, drawing, partner talk, translated stems, movement, and reflection.

2.4 TEACH AND RETEACH SCHOOLWIDE ROUTINES

Routine teaching turns schoolwide expectations into visible actions students can perform consistently.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use when a routine launches, after breaks, during transitions, when data shows slippage, or when a group needs reteaching.
Primary adult owner	Teachers own classroom routines; grade teams and leaders own common-space routines.
Complete when	Students can perform the routine with minimal prompting across the relevant setting.

◆ ADULT OPERATING SEQUENCE

- 1 Name the setting and expectation: Safe, Respectful, or Responsible.
- 2 Show a model of the routine in the actual space.
- 3 Name a non-example without using a student as the example.
- 4 Let students practice the routine immediately.
- 5 Give brief feedback tied to the expectation.
- 6 Repeat practice until the routine is visible.
- 7 Reinforce accurate performance with precise recognition.
- 8 Reteach when observation or data shows the routine is not yet secure.

◆ STUDENT EXPERIENCE

Students see, hear, practice, and receive feedback before they are corrected for not meeting the expectation.

◆ FAMILY COMMUNICATION

Major routine launches may be communicated to families in plain language.

◆ DOCUMENTATION

Reteaching of a group routine may be noted in team planning tools. Individual support is documented when a student requires targeted follow-up.

EQUITY CHECK

Adults use visuals, gestures, home-language support when available, and concrete examples rather than relying on verbal explanation alone.

2.5 USE THE RETEACH AS THE IMMEDIATE CONSEQUENCE

When a group routine breaks down, the most instructional response is often to pause, reteach, and practice again.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use when a classroom, hallway line, transition, cafeteria procedure, or assembly routine falls below the taught standard.
Primary adult owner	The adult responsible for the setting.
Complete when	The group performs the routine at the expected level or the adult identifies the smaller group or individual support needed.

◆ ADULT OPERATING SEQUENCE

- 1 Pause the routine without sarcasm or public blame.
- 2 Name the expectation and the reason it matters for learning or safety.

- 3 Reset the group to the starting point when appropriate.
- 4 Model or narrate the expected action.
- 5 Practice again immediately.
- 6 Recognize evidence once the routine improves.
- 7 Reserve individual consequences or supports for students who still need separate intervention after the routine is retaught.

◆ STUDENT EXPERIENCE

Students experience reteaching as normal instructional practice rather than group humiliation.

◆ FAMILY COMMUNICATION

Family communication is not required for routine group reteaching.

◆ DOCUMENTATION

Group reteaching is not usually documented unless it reveals a repeated pattern requiring team review.

EQUITY CHECK

Do not use repeated public reteaching to shame a class or target a few students indirectly.

2.6 CALIBRATE GRADE-BAND EXPECTATIONS

Grade-band calibration keeps expectations developmentally appropriate while preserving one schoolwide culture language.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use during planning, Culture Camp, grade-level meetings, routine reteaching, and coaching.
Primary adult owner	Grade teams with culture leadership.
Complete when	Adults can name what the expectation looks like for their grade band and setting.

◆ ADULT OPERATING SEQUENCE

- 1 Translate Safe, Respectful, Responsible into grade-appropriate language.
- 2 Identify what each expectation looks like in classrooms and common spaces.
- 3 Use visuals and models for younger students and more explicit rationale for older students.
- 4 Agree on what adults will say in the moment.
- 5 Use the same replacement behavior language across adults.
- 6 Review whether expectations are too vague, too adult-centered, or not developmentally matched.

◆ STUDENT EXPERIENCE

Students hear language they can understand and practice successfully at their developmental level.

◆ FAMILY COMMUNICATION

Families may receive grade-band language during launch, conferences, and support planning.

◆ DOCUMENTATION

Grade-team calibration notes should capture major routine decisions and language shifts.

EQUITY CHECK

Expectations should not become lower for students with additional needs; support should become clearer, more visual, more practiced, and more accessible.

2.7 TEACH COMMON-SPACE CULTURE

Common spaces carry the culture students experience between classrooms. They require explicit instruction and adult consistency.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use for arrival, hallway, restroom, cafeteria, recess, assembly, dismissal, and movement through the building.
Primary adult owner	All adults assigned to the space; leaders own calibration and coverage.
Complete when	The routine is visible, safe, and consistent across adults.

◆ ADULT OPERATING SEQUENCE

- 1 Teach the routine in the actual space.
- 2 Post or use visible cues when possible.
- 3 Position adults where behavior is most likely to drift.
- 4 Recognize evidence of the routine before correcting missteps.
- 5 Use brief correction that names the next action.
- 6 Reteach the group routine when patterns show the expectation is not yet learned.
- 7 Report repeated patterns to the culture team for review.

◆ STUDENT EXPERIENCE

Students experience common spaces as predictable and supervised without feeling policed or watched for failure.

◆ FAMILY COMMUNICATION

Families are contacted for patterns or significant events, not for every minor common-space reminder.

◆ DOCUMENTATION

Significant incidents, repeated patterns, and safety concerns are documented in the appropriate system.

EQUITY CHECK

Common-space data should be reviewed for location, time, grade band, adult coverage, and disproportionality.

PART 3

REINFORCE BELONGING AND IDENTITY

PART PURPOSE

Use recognition, gratitude, Houses, celebrations, and family visibility to make culture visible, social, and identity-building.

Culture becomes strong when students see evidence that their actions matter to the community. Recognition at Matchbook should not reward only quiet compliance. It should make visible belonging, effort, repair, leadership, help-seeking, self-regulation, gratitude, growth, and contribution.

◆ THIS PART CONTROLS:

- ◆ LiveSchool as the behavior economy, recognition evidence, House points, rewards, and family visibility system.
- ◆ GiveThx as the gratitude, belonging, peer appreciation, staff appreciation, and relationship evidence layer.
- ◆ Houses, Cardinal Cash, Friday Cypher, VIP, Student of the Week, and celebration cycles.
- ◆ Equity checks that ensure students are not ignored, overcorrected, or excluded from recognition.

OPERATING STANDARD

Recognition is evidence, not decoration. Adults should be able to tell students what behavior was recognized and why it matters to the community.

3.1 USE LIVESCHOOL FOR THE BEHAVIOR ECONOMY

LiveSchool is used to make Safe, Respectful, Responsible evidence visible through points, House points, rewards, family visibility, behavior evidence, and data review.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use when a student demonstrates evidence of expectations, when House or rewards systems are active, when behavior evidence must be recorded after stabilization, or when the team reviews culture data.
Primary adult owner	All adults award points; culture leadership calibrates categories; leaders and MTSS teams review patterns.
Complete when	Recognition and behavior evidence are timely, accurate, tied to expectations, and reviewed for patterns.

◆ ADULT OPERATING SEQUENCE

- 1 Award points for observed evidence tied to a taught expectation.
- 2 Use consistent categories aligned to Safe, Respectful, Responsible.
- 3 Avoid vague praise that students cannot connect to a behavior.
- 4 Use House points to strengthen collective identity and belonging.
- 5 Use LiveSchool evidence for celebration systems when appropriate.
- 6 Enter behavior evidence after stabilization rather than during escalation.
- 7 Review data for disproportionality, invisibility, and overcorrection.

◆ STUDENT EXPERIENCE

Students understand why they earned recognition and how their actions contribute to the classroom, House, and school community.

◆ FAMILY COMMUNICATION

Families receive visibility into positive evidence and patterns through school communication routines and available platform features.

◆ DOCUMENTATION

LiveSchool is a culture evidence and behavior economy platform. Official records are maintained in the required system when official documentation is required.

EQUITY CHECK

Audit who receives positives, corrections, referrals, rewards, and public recognition. Adjust adult practice when patterns show bias or invisibility.

3.2 USE GIVETHX FOR GRATITUDE AND BELONGING

GiveThx strengthens gratitude, peer recognition, adult appreciation, staff culture, and belonging evidence.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use during Morning Meeting, advisory, grade-band belonging repair, staff culture routines, or when data shows students may be socially invisible.
Primary adult owner	Teachers facilitate student practice; leaders monitor trends; staff model adult-to-adult gratitude.
Complete when	Students practice meaningful appreciation and leaders can identify belonging gaps.

◆ ADULT OPERATING SEQUENCE

- 1 Teach what meaningful appreciation sounds like.
- 2 Provide sentence stems and examples in accessible language.
- 3 Use GiveThx for peer-to-peer, adult-to-student, and staff appreciation routines.
- 4 Review who is giving and receiving appreciation.
- 5 Use data to identify students who need intentional connection.
- 6 Connect gratitude themes to Safe, Respectful, Responsible.
- 7 Protect gratitude routines from becoming popularity contests.

◆ STUDENT EXPERIENCE

Students learn to name positive impact, receive affirmation, and see themselves as valued contributors.

◆ FAMILY COMMUNICATION

Families may receive examples of how gratitude routines support belonging and relationship-building.

◆ DOCUMENTATION

GiveThx data is used for belonging and relationship trends. It is not used as a disciplinary record.

EQUITY CHECK

Provide multilingual stems and nonverbal options. Ensure appreciation reaches students who are quiet, new, multilingual, isolated, or frequently corrected.

3.3 OPERATE HOUSES AND CARDINAL CASH

Houses and Cardinal Cash translate individual behavior evidence into shared identity, motivation, and celebration.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use during daily recognition, weekly House cycles, reward windows, Friday Cypher preparation, and culture challenges.
Primary adult owner	Culture leadership owns system design; all staff reinforce; students participate and lead when appropriate.
Complete when	The system is active, visible, predictable, and connected to values.

◆ ADULT OPERATING SEQUENCE

- 1
- Connect House identity to Safe, Respectful, Responsible rather than competition alone.

- 2 Award House points for values-based evidence.
- 3 Use Cardinal Cash or rewards to reinforce behaviors without making rewards the only reason to participate.
- 4 Publish or announce House progress at predictable times.
- 5 Celebrate contributions from multiple grade bands and student groups.
- 6 Use rewards to amplify intrinsic identity, not replace it.

◆ STUDENT EXPERIENCE

Students experience belonging to something larger than an individual classroom and see how their choices affect the collective.

◆ FAMILY COMMUNICATION

Families may receive updates when House identity, rewards, or recognition cycles are featured.

◆ DOCUMENTATION

House points and rewards are tracked through the appropriate culture platform and reviewed for fairness.

EQUITY CHECK

House recognition must not consistently privilege the same students, grade bands, staff relationships, or behavior style.

3.4 PREPARE AND RUN FRIDAY CYPHER

Friday Cypher is the weekly celebration rhythm that makes the school's values visible across the building.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use weekly to recognize students, Houses, classroom progress, repair, growth, leadership, and schoolwide culture focus areas.
Primary adult owner	Culture leadership plans; teachers nominate; students participate and lead when developmentally appropriate.
Complete when	The weekly celebration reinforces values and gives students a clear next focus.

◆ ADULT OPERATING SEQUENCE

- 1 Identify the week's culture focus and the evidence adults should notice.
- 2 Use LiveSchool, GiveThx, House data, teacher nominations, and student leadership examples to prepare recognition.
- 3 Include evidence of growth, repair, leadership, self-regulation, and contribution.
- 4 Keep the celebration tight, joyful, and values-aligned.
- 5 Preview the next focus so students know what to practice.
- 6 Use the celebration to strengthen belonging, not embarrass or rank students publicly.

◆ STUDENT EXPERIENCE

Students see Matchbook values celebrated through peers, Houses, staff language, music, identity, and visible recognition.

◆ FAMILY COMMUNICATION

Families may receive highlights, photos when permitted, or recognition summaries through school communication channels.

◆ DOCUMENTATION

Recognition selections and participation patterns are tracked for equity review.

EQUITY CHECK

Friday Cypher should include students who are improving, repairing, contributing quietly, and leading positively, not only students already recognized frequently.

3.5 SELECT VIP AND STUDENT OF THE WEEK

VIP and Student of the Week recognition should communicate what Matchbook values and who belongs.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use during weekly or monthly recognition cycles.
Primary adult owner	Teachers nominate; culture leadership calibrates; students and families receive recognition.
Complete when	Recognition is specific, values-aligned, and distributed equitably over time.

◆ ADULT OPERATING SEQUENCE

- 1

Use value-based evidence, not adult preference or popularity.
- 2

Consider growth, repair, leadership, effort, gratitude, self-regulation, academic risk-taking, and community support.
- 3

Review whether nominations reflect the full student body.
- 4

Write recognition language that names the behavior and its impact.
- 5

Share recognition in ways that build dignity and belonging.

◆ STUDENT EXPERIENCE

Students understand that recognition is tied to values and growth, not perfection.

◆ FAMILY COMMUNICATION

Families receive positive, specific communication when their student is recognized.

◆ DOCUMENTATION

Nomination evidence and recognition patterns are retained in the appropriate tracker or platform.

EQUITY CHECK

Do not reward only quiet compliance. Include students whose success is growth, repair, courage, leadership, help-seeking, or relational contribution.

3.6 USE RECOGNITION DATA TO IMPROVE ADULT PRACTICE

Recognition data shows what adults notice, what they miss, and whether belonging is being distributed across the campus.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use during weekly culture review, leadership meetings, coaching cycles, and monthly equity checks.
Primary adult owner	Culture leadership, grade leads, and administrators.
Complete when	The team identifies an adult action, implements it, and reviews whether recognition patterns improved.

◆ ADULT OPERATING SEQUENCE

- 1 Review who receives positive recognition and who does not.
- 2 Compare recognition with correction and referral patterns.
- 3 Look by grade, classroom, race, gender, language, disability, newcomer status, and other relevant student groups when available.
- 4 Identify adults or settings where positive recognition is low or inconsistent.

5 Set one adult practice adjustment for the next cycle.

6 Follow up during walkthroughs and coaching.

◆ STUDENT EXPERIENCE

Students experience more consistent recognition across spaces and do not become invisible because they are quiet, isolated, multilingual, or frequently corrected.

◆ FAMILY COMMUNICATION

Family communication should increase positive-first contact, especially for students whose families typically hear from school only when there is a concern.

◆ DOCUMENTATION

Data review notes should identify patterns and adult actions without exposing unnecessary student narrative.

EQUITY CHECK

The goal is not equal point totals for every group. The goal is adult practice that notices evidence fairly and responds to gaps.

PART 4

RESPOND AND REPAIR

PART PURPOSE

Define the adult response sequence when culture breaks down so students remain connected to instruction, dignity, accountability, and repair.

When behavior interrupts learning or harms the community, adults protect instruction without severing belonging. The response is not a place. The response is a sequence of adult moves that begins with regulation and ends with return-to-learning, documentation, and pattern review.

◆ THIS PART CONTROLS:

- ◆ Least-invasive classroom response.
- ◆ Live intervention diagnostic: rigor gap, access gap, regulation gap, or safety concern.
- ◆ In-class reset and supported reset outside the room.
- ◆ Restorative team push-in and classroom coverage.
- ◆ Regulation Station, Restorative Room, and Restorative Re-Entry Center.
- ◆ Repair conversations, re-entry, Live Card, LiveSchool, PowerSchool, and family communication.

OPERATING STANDARD

A student may leave the classroom temporarily only when the student or learning environment needs support that cannot safely or effectively happen in the room. The purpose is not exclusion. The purpose is regulation, repair, return-to-learning, and pattern review.

4.1 USE THE LEAST-INVASIVE CLASSROOM RESPONSE

Resolve routine disruptions inside the classroom whenever it is safe and effective to do so.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use when a student is off task, a routine is not followed, early dysregulation appears, or the class needs a quick reset.
Primary adult owner	Classroom teacher.
Complete when	The student returns to the routine or receives the next lowest support.

◆ ADULT OPERATING SEQUENCE

- 1 Regulate yourself before correcting the student.
- 2 Use nonverbal cue, proximity, or quiet prompt first when appropriate.
- 3 Name the routine or next action, not the child.
- 4 Use brief, private language.
- 5 Offer a choice between two safe next steps when needed.
- 6 Provide an in-class reset option if the student can remain safely in community.
- 7 Return attention to instruction quickly.
- 8 Document only if the pattern requires follow-up.

◆ STUDENT EXPERIENCE

The student receives support without public shame and has a clear path back into the task.

◆ FAMILY COMMUNICATION

No family contact is required for an isolated minor redirection. Contact family when a pattern emerges or a support process begins.

◆ DOCUMENTATION

Teachers may track classroom pattern notes. Official documentation is used when the pattern, safety level, or tier requirement demands it.

EQUITY CHECK

Do not escalate tone, volume, or consequence because a student communicates differently, processes slowly, or needs language support.

4.2 RUN THE LIVE INTERVENTION DIAGNOSTIC

Before choosing a response, adults determine whether the disruption is primarily a rigor gap, access gap, regulation gap, or safety concern.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use when a teacher requests support, a restorative leader pushes in, a disruption continues after classroom support, or a student is repeatedly sent out of instruction.
Primary adult owner	Teacher first; support staff and leaders assist when called.
Complete when	The adult response is matched to access, rigor, regulation, or safety need.

◆ ADULT OPERATING SEQUENCE

- 1

Check rigor: Is the student under-challenged, disengaged by low demand, or avoiding work because the task lacks purpose?
- 2

Check access: Is the student missing materials, directions, language support, scaffolds, prerequisite skill, or executive-function support?
- 3

Check regulation: Is the student outside the range where reasoning, reflection, or academic work is currently available?
- 4

Check safety: Is there immediate risk to the student, others, or the learning environment?

- 5 Match the response to the need instead of defaulting to removal.
- 6 Record repeated patterns for team review.

◆ STUDENT EXPERIENCE

Students receive support that matches the actual barrier rather than a one-size-fits-all discipline response.

◆ FAMILY COMMUNICATION

Families are contacted when the pattern requires partnership, support planning, or escalation.

◆ DOCUMENTATION

Document the selected support and repeated patterns when the issue requires follow-up.

EQUITY CHECK

Adults avoid interpreting every disruption as defiance. The first question is what support, access, or condition is missing.

4.3 USE IN-CLASS RESET

In-Class Reset gives students a short, dignified way to regulate while remaining connected to the learning community.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use when a student needs a brief reset and can remain safely in the room without disrupting instruction.
Primary adult owner	Classroom teacher.
Complete when	Student returns to the learning task or the adult determines a stronger support is needed.

◆ ADULT OPERATING SEQUENCE

- 1 Teach reset options before students need them.
- 2 Offer reset quietly and neutrally.
- 3 Set a short time limit or clear return cue.
- 4 Provide simple tools: breathing card, reflection prompt, sensory object, timer, quiet seat, or visual next step.
- 5 Do not turn the reset space into public punishment.
- 6 Invite the student back with a clear next action.
- 7 Recognize successful return when appropriate.

◆ STUDENT EXPERIENCE

Students learn that asking for or accepting regulation support is responsible behavior.

◆ FAMILY COMMUNICATION

Family contact is not required for ordinary in-class reset use. If the reset becomes a repeated support, communicate the strategy as a support, not a warning.

◆ DOCUMENTATION

No formal documentation is required unless repeated use signals a pattern or support need.

EQUITY CHECK

Reset spaces should be accessible and non-stigmatizing. Students should not be sent there in ways that announce shame to peers.

4.4 REQUEST RESTORATIVE TEAM PUSH-IN

Restorative push-in protects instruction while helping the teacher and student resolve the moment without creating office dependency.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use when classroom support has not resolved the disruption, the teacher needs co-regulation support, or the student needs a brief adult connection before rejoining.
Primary adult owner	Teacher requests support; restorative team responds; teacher remains owner of the classroom relationship.
Complete when	Instruction continues, the student receives matched support, and the teacher-student relationship remains primary.

◆ ADULT OPERATING SEQUENCE

- 1 Teacher gives the support adult brief, factual information only.
- 2 Support adult enters calmly and observes before acting when possible.
- 3 Support adult helps diagnose access, rigor, regulation, or safety need.
- 4 If the student can remain in class, support the student in place.
- 5 If the teacher-student relationship needs repair, support coverage so the teacher can repair when feasible.
- 6 If the student needs a supported reset outside the room, transition without hallway processing.
- 7 Return the student with a clear re-entry step.

◆ STUDENT EXPERIENCE

Students experience the restorative team as support for staying connected to learning, not as the people who take students away.

◆ FAMILY COMMUNICATION

Family communication follows the significance and pattern of the event, not the mere fact that a support adult entered the room.

◆ DOCUMENTATION

The support adult logs the support if it becomes a restorative intervention, pattern, or tier-related support.

EQUITY CHECK

The restorative team is not a fixing department. It builds adult capacity, supports co-regulation, and helps preserve the primary classroom relationship.

4.5 USE SUPPORTED RESET OUTSIDE THE CLASSROOM

Supported Reset provides short-term co-regulation outside the immediate classroom pressure when the student or class needs support that cannot happen effectively in the room.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use when in-class support is not enough, the classroom environment needs immediate protection, or the student needs a staffed reset to return safely.
Primary adult owner	Teacher initiates; restorative team or assigned support adult supervises; leaders monitor patterns.
Complete when	The student is regulated enough to return, or the team determines the next level of support is required.

◆ ADULT OPERATING SEQUENCE

- 1 Use calm, low-word transition language.
- 2 Send only the information needed for safe support and return.
- 3 Do not process the incident in the hallway.
- 4 Begin with regulation, not interrogation.
- 5 Use a timer or return condition appropriate to the student and situation.
- 6 Determine whether the next step is return, repair, family communication, or team review.

7 Return the student with a clear entry sentence or teacher handoff.

◆ **STUDENT EXPERIENCE**

Students receive a structured pause that helps them return to learning rather than an exclusion that communicates rejection.

◆ **FAMILY COMMUNICATION**

Families should hear that regulation support is not punishment. Contact family when the event is significant, repeated, or linked to a tier plan.

◆ **DOCUMENTATION**

Document the support, duration when relevant, return plan, and pattern if repeated.

EQUITY CHECK

Supported reset must be supervised, time-bound, and tied to return. It must not become an untracked holding space.

4.6 OPERATE THE REGULATION STATION AND RESTORATIVE ROOM

The Regulation Station and Restorative Room provide calm, supervised spaces for regulation, reflection, skill practice, and return-to-learning.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use when a student needs a structured reset, restorative support, reflection, or re-entry planning after a behavior event.
Primary adult owner	Restorative team or assigned support adult; teacher remains connected to repair when the rupture involved the teacher.
Complete when	The student has regulated, knows the next step, and has a return plan or escalated support plan.

◆ ADULT OPERATING SEQUENCE

- 1 Receive the student with calm, neutral language.
- 2 Prioritize regulation before reasoning or reflection.
- 3 Use quiet, brief prompts and give processing time.
- 4 When the student is regulated, guide reflection around what happened, who was affected, what expectation applies, and what repair or next step is needed.
- 5 Coordinate with the teacher for re-entry or repair.
- 6 Return the student to instruction as soon as safe and supportive.
- 7 Log the support and flag repeated use for review.

◆ STUDENT EXPERIENCE

Students experience the space as structured support, not isolation or a place to be forgotten.

◆ FAMILY COMMUNICATION

Family communication is required when the event is significant, repeated, part of a support plan, or requires formal follow-up.

◆ DOCUMENTATION

Log reason, support provided, duration when relevant, repair or re-entry plan, and next step.

EQUITY CHECK

Adults do not force apology, reflection, or academic work before regulation. Students are not left alone.

4.7 CONDUCT TEACHER-LED REPAIR

The adult who experienced the relational rupture should participate in repair whenever safe and feasible, because the goal is to restore the primary learning relationship.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use after conflict, disrespectful exchange, refusal, peer harm, classroom disruption, or a restorative reset when the student is regulated enough to participate.
Primary adult owner	Teacher leads when the rupture is teacher-student; restorative team coaches, covers, or facilitates as needed.
Complete when	The student and adult know the re-entry step, repair action, and follow-up expectation.

◆ ADULT OPERATING SEQUENCE

- 1 Wait until the student and adult are regulated.
- 2 Hold the conversation privately whenever possible.
- 3 Begin with the goal of restoring learning, not proving adult authority.
- 4 Ask what happened, who was affected, what expectation was missed, and what next step repairs the harm.
- 5 Name the adult support that will help the student succeed next time.
- 6 Agree on the re-entry sentence or plan.
- 7 Follow up with brief positive connection after the student returns.

◆ STUDENT EXPERIENCE

Students experience accountability with a way back into relationship and instruction.

◆ FAMILY COMMUNICATION

Families are contacted when the incident is significant, repeated, or connected to tier support. Communication should include the repair plan, not just the behavior.

◆ DOCUMENTATION

Document repair when the event required a formal restorative process, support plan, family contact, or team review.

EQUITY CHECK

Repair is not public discipline. Do not force apology as performance. Repair can include conversation, action, restoration, service, or changed behavior.

4.8 CREATE THE RE-ENTRY PLAN

Re-entry makes return-to-learning explicit so students do not come back to class carrying shame, confusion, or unresolved expectations.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use after supported reset, restorative room, extended reset, ISS-coded response, OSS, safety-related absence, or extended absence.
Primary adult owner	Restorative team, teacher, administrator, counselor, or support owner depending on the event.
Complete when	The student returns with a clear next action and adult follow-up is assigned.

◆ ADULT OPERATING SEQUENCE

- 1

Confirm the student is regulated enough to return.
- 2

Name the next expected behavior in Safe, Respectful, Responsible language.
- 3

Identify any repair action required before or after return.
- 4

Plan the teacher greeting or entry sentence.
- 5

Determine what academic work or materials the student needs.
- 6

Identify the check-in adult and time.
- 7

Monitor the first return period or first day when needed.

◆ STUDENT EXPERIENCE

Students know how to return without guessing, defending, or re-litigating the incident in public.

◆ FAMILY COMMUNICATION

Families receive re-entry information when the incident was significant or connected to formal support.

◆ DOCUMENTATION

Document the re-entry plan when the event involved formal removal, safety, tier support, or family communication.

EQUITY CHECK

Return to instruction should not be delayed by adult scheduling barriers unless safety or required procedure demands it.

4.9 USE RESTORATIVE RE-ENTRY CENTER

The Restorative Re-Entry Center provides structured accountability, regulation, skill-building, academic access, and re-entry planning for behavior that requires extended support.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use when a student requires a longer restorative response than a brief reset, when policy requires an ISS-coded response, or when the team determines extended supervised support is needed to protect safety and learning.
Primary adult owner	Administrator or designated lead; restorative team supports regulation, repair, and academic access.
Complete when	The student has completed the required support steps, has a re-entry plan, and knows the next expectation.

◆ ADULT OPERATING SEQUENCE

- 1 Begin with regulation and clear expectations for the space.
- 2 Ensure the student has access to appropriate academic work.
- 3 Provide restorative reflection only after regulation.
- 4 Identify the replacement skill or support needed.
- 5 Coordinate teacher-led repair when the rupture involved the classroom relationship.
- 6 Contact family according to the event level and required procedures.
- 7 Complete re-entry planning before the student returns to the next setting.

◆ STUDENT EXPERIENCE

Students experience the setting as a structured path back to learning, not a holding room or public punishment.

◆ FAMILY COMMUNICATION

Family communication is same-day when required and should explain the support, expectation, repair, and re-entry plan.

◆ DOCUMENTATION

Official systems may use required discipline codes. The campus-facing process still documents regulation, reflection, academic access, repair, family contact, and re-entry.

EQUITY CHECK

Family partnership is required. Family availability cannot be used as a hidden exclusion barrier; when immediate meeting is not possible, create a provisional re-entry plan and schedule follow-up as soon as possible.

4.10 MOVE FROM LIVE CARD TO LIVESCHOOL AND OFFICIAL DOCUMENTATION

The in-the-moment response and the official record are different tasks. Adults stabilize first, then document accurately.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use during behavior events, restorative support, tier monitoring, referral decisions, and family communication.
Primary adult owner	Teacher or responding adult for initial notes; support owner or administrator for formal documentation when required.
Complete when	The event is stabilized, the correct record is entered, and follow-up is assigned.

◆ ADULT OPERATING SEQUENCE

- 1 Use the Live Card or immediate support tool to manage the moment without interrupting regulation.
- 2 Do not stop a dysregulated moment to write a long record.
- 3 After stabilization, enter evidence in LiveSchool when it relates to behavior economy, recognition, patterns, or support evidence.
- 4 Use official documentation systems when the event requires a formal record.
- 5 Write observable facts: what happened, what adults did, how the student responded, and what comes next.
- 6 Avoid labels, motives, diagnoses, and emotional language.
- 7 Update the team tracker when the student is in a support cycle.

◆ STUDENT EXPERIENCE

Students experience adult response first, not paperwork first. Documentation does not replace support.

◆ FAMILY COMMUNICATION

Family communication should match the significance of the event and include the next support step.

◆ DOCUMENTATION

Documentation must show the support provided, not only the behavior observed.

EQUITY CHECK

Review whether documentation language differs by student group. The same behavior should not be described more harshly for some students than others.

4.11 REVIEW PATTERNS AFTER REPEATED RESPONSE

Repeated response tells the team that the system needs to learn something: about the student, the adult response, the setting, the routine, or the support plan.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use when a student has repeated resets, restorative visits, referrals, corrections, family contacts, or exclusionary responses.
Primary adult owner	Culture/MTSS team.
Complete when	The team makes a decision with owner, action, due date, and review date.

◆ ADULT OPERATING SEQUENCE

- 1 Review setting, time, task, adult, peer dynamics, access, regulation, and prior support.
- 2 Ask what has been taught or retaught.
- 3 Ask what adult response has been consistent or inconsistent.
- 4 Determine whether the pattern needs Tier 1 reteach, Tier 2 support, Tier 3 review, family partnership, wellness routing, or safety procedure.

- 5 Assign an owner and review date.
 - 6 Communicate next steps to the relevant adults and family when required.
-

◆ STUDENT EXPERIENCE

Students experience support that becomes more precise rather than adults repeating the same ineffective response.

◆ FAMILY COMMUNICATION

Families are contacted when the pattern requires partnership, support planning, or tier movement.

◆ DOCUMENTATION

Pattern review is documented in the culture/MTSS decision log and relevant student systems.

EQUITY CHECK

Pattern review should include adult practice, not only student behavior. Ask where the system may be producing or worsening the pattern.

PART 5

INTENSIFY SUPPORT AND PROTECT RIGHTS

PART PURPOSE

Define how the campus provides targeted and intensive support while protecting access, safety, family partnership, due process, and student rights.

Some students need more than universal culture supports. Intensifying support should make the system more precise, not more punitive. The goal is to understand need, teach replacement skills, coordinate adult response, involve families, document accurately, protect rights, and return students to the least restrictive successful support as soon as appropriate.

◆ THIS PART CONTROLS:

- ◆ Behavior MTSS decision rules and Tier 1 gatekeeping.
- ◆ Tier 2 CICO/DBRC, mentors, progress monitoring, and exit criteria.
- ◆ Tier 3 intensive support, behavior contracts, BSP, FBA/BIP, and special-population collaboration.
- ◆ Attendance, wellness, safety, suicide ideation, DCS, Title IX, McKinney-Vento, Foster Care, Aspire, OSS/due process, expulsion, missing student, and withdrawal pathways.

OPERATING STANDARD

A higher tier is not a label. It is a coordinated set of adult actions, progress measures, family communication, documentation, and review dates.

5.1 USE BEHAVIOR MTSS DECISION RULES

Behavior MTSS ensures students move through support based on data, fidelity, need, and team decision-making rather than adult frustration or isolated incidents.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use when a student shows a pattern of need, a referral is submitted, a support cycle reaches review, or special-entry concerns arise.
Primary adult owner	Culture/MTSS team with leadership oversight.
Complete when	A tier decision includes the support, owner, start date, progress measure, family contact, and review date.

◆ ADULT OPERATING SEQUENCE

- 1 Define the concern in observable terms.
- 2 Confirm Tier 1 expectations were taught, retaught, documented, and communicated to family when appropriate.
- 3 Review multiple data sources rather than one incident.
- 4 Select the least intensive support likely to work.
- 5 Name the owner, progress measure, family communication step, and review date.
- 6 Use team review for movement between tiers.
- 7 Document decisions before implementation begins.

◆ STUDENT EXPERIENCE

Students receive support matched to need rather than being moved through tiers as a punishment ladder.

◆ FAMILY COMMUNICATION

Family partnership is required at every tier, with communication matched to the support being initiated.

◆ DOCUMENTATION

Tier movement must be traceable to data, team decision, and documented support.

EQUITY CHECK

Tier movement is never based on one adult’s frustration. Review adult practice and universal supports before intensifying.

5.2 COMPLETE TIER 1 GATEKEEPING BEFORE TIER 2

Tier 1 gatekeeping protects students from unnecessary escalation and protects the school from using targeted supports as a shortcut around universal practice.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use before a student is considered for Tier 2 behavior support unless safety or special-entry criteria require immediate review.
Primary adult owner	Teacher implements; Tier 1 administrator or designated leader verifies.
Complete when	Tier 1 is complete or the team identifies the missing adult action that must happen before escalation.

◆ ADULT OPERATING SEQUENCE

- 1

Teach or reteach the relevant expectation.
- 2

Use classroom interventions such as proximity, reset, seating adjustment, positive narration, brief conference, or routine practice.
- 3

Document observable behavior and adult support.
- 4

Make early family contact as a partnership step.
- 5

Track the pattern across the required cycle unless safety requires faster review.
- 6

Complete the Tier 1 checklist.
- 7

Submit evidence for team review before Tier 2 begins.

◆ STUDENT EXPERIENCE

Students receive clear universal support before being placed in a targeted support process.

◆ FAMILY COMMUNICATION

Family contact should be early, warm, factual, and support-oriented.

◆ DOCUMENTATION

Documentation must show what adults tried, not only what the student did.

EQUITY CHECK

If Tier 1 expectations were unclear, inconsistently taught, or not accessible, fix Tier 1 before assigning the concern to the student.

5.3 IMPLEMENT TIER 2 CICO AND DBRC

CICO and DBRC provide predictable adult connection, frequent feedback, and progress monitoring for students who need targeted support.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use when Tier 1 is complete and a team determines the student needs structured feedback, or when special-entry criteria require faster targeted support.
Primary adult owner	Dean or Tier 2 lead for setup; mentor/check-in adult for daily support; teachers provide ratings and feedback.
Complete when	The student meets exit criteria, the plan is revised, or the team intensifies support based on data.

◆ ADULT OPERATING SEQUENCE

- 1 Hold the family partnership meeting or contact required before support begins.
- 2 Define one to three positively stated goals connected to Safe, Respectful, Responsible.

- 3 Assign a mentor or check-in adult.
- 4 Teach the student how the card, ratings, and feedback will work.
- 5 Teachers provide period ratings with one useful sentence of feedback.
- 6 Mentor completes check-in and check-out.
- 7 Review weekly data and decide continue, revise, fade, exit, or intensify.

◆ STUDENT EXPERIENCE

Students experience DBRC/CICO as coaching and feedback, not punishment or a public scorecard.

◆ FAMILY COMMUNICATION

Families receive an explanation of the support, how to respond at home, and how the school will review progress.

◆ DOCUMENTATION

Track daily scores, weekly averages, goal progress, family contact, and review decisions.

EQUITY CHECK

The number alone is not feedback. Feedback is the brief conversation that helps the student know what worked, what was hard, and what strategy to try next.

5.4 OPERATE TIER 3 INTENSIVE SUPPORT

Tier 3 coordinates individualized support when a student's needs exceed Tier 1 and Tier 2 routines.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use for persistent non-response to Tier 2, safety concerns, repeated removals, intensive behavior patterns, elopement, attendance/behavior overlap, wellness concerns, or special-entry needs.
Primary adult owner	Director or Tier 3 lead with administrator, counselor, teacher, family, and special-population partners as needed.
Complete when	The team can show what support is active, who owns it, how progress is measured, and when it will be reviewed.

◆ ADULT OPERATING SEQUENCE

- 1 Clarify the primary concern and immediate safety or access needs.
- 2 Review prior Tier 1 and Tier 2 fidelity.
- 3 Select the least intensive effective intensive tool: BSP, behavior contract, critical behavior contract, DBRC-with-skills, modified support plan, FBA/BIP consideration, safety plan, Aspire/wellness referral, or family support pathway.
- 4 Assign observable daily adult actions.
- 5 Name data source and review schedule.
- 6 Communicate need-to-know plan elements to staff.
- 7 Review at least weekly for active high-risk students.

◆ STUDENT EXPERIENCE

Students experience a coordinated plan rather than disconnected adult reactions.

◆ FAMILY COMMUNICATION

Families participate in planning unless a safety or legal exception applies.

◆ DOCUMENTATION

Maintain one active plan, revision history, owner, daily actions, data source, and next review date in restricted storage.

EQUITY CHECK

Tier 3 should increase precision and support. It should not become a pathway to exclusion without instruction, repair, and review.

5.5 USE BEHAVIOR CONTRACTS AND CRITICAL BEHAVIOR CONTRACTS

Behavior contracts create explicit written expectations, supports, and review commitments for students needing high clarity and family partnership.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use when a student needs written expectations after repeated support or when behavior creates high risk for exclusion or safety concerns.
Primary adult owner	Director or administrator with family, student, and relevant support team.
Complete when	The contract is reviewed by the scheduled date and either continued, revised, faded, or escalated through the appropriate pathway.

◆ ADULT OPERATING SEQUENCE

- 1 Review the pattern and prior supports before drafting the contract.
- 2 Write expectations in observable, positive language.
- 3 Name adult supports, not only student consequences.
- 4 Set a short review window.
- 5 Identify how progress will be measured.
- 6 Ensure the student and family understand the plan.
- 7 Monitor and revise through team review rather than waiting for failure.

◆ STUDENT EXPERIENCE

Students understand what is expected, what support adults will provide, and how success will be reviewed.

◆ FAMILY COMMUNICATION

Families participate in the plan and receive updates on progress and concerns.

◆ DOCUMENTATION

Signed plans, review notes, and revisions are stored in restricted systems and summarized only for need-to-know staff.

EQUITY CHECK

A contract cannot be only a list of consequences. It must include adult supports, replacement skills, and conditions for success.

5.6 BEGIN FBA/BIP WORKFLOW WHEN NEEDED

FBA/BIP is used when behavior patterns require function-based analysis and a formal plan for replacement behavior, adult response, and environmental support.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use when data suggests the function of behavior must be understood, when prior supports have not worked, or when required by special education or team decision.
Primary adult owner	MTSS team, special education team when applicable, Director or designated behavior lead.
Complete when	The team has a function-based plan with implementation expectations and review dates.

◆ ADULT OPERATING SEQUENCE

- 1
- Confirm prior support fidelity and the reason for FBA/BIP consideration.

- 2 Collect data from multiple sources, including ABC information when appropriate.
- 3 Identify setting events, antecedents, behavior, consequences, and possible function.
- 4 Define replacement behavior that serves the same function in a safer or more successful way.
- 5 Develop adult response and prevention strategies.
- 6 Monitor implementation and student progress.
- 7 Review and revise through the appropriate team process.

◆ STUDENT EXPERIENCE

Students receive a plan that teaches a better way to meet the underlying need instead of repeated consequences for the same behavior.

◆ FAMILY COMMUNICATION

Families are included according to the applicable MTSS, 504, or special education process.

◆ DOCUMENTATION

FBA/BIP documents are maintained according to required procedures and access rules.

EQUITY CHECK

Do not use FBA/BIP to delay immediate safety support. Do not use it to avoid required special education or disability-related procedures.

5.7 RUN THE ATTENDANCE SUPPORT PATHWAY

Attendance is a wellness, access, and learning indicator. The campus response must distinguish willful absence from barrier-based absence and respond accordingly.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use daily for absence monitoring and whenever a student reaches attendance thresholds or shows a concerning pattern.
Primary adult owner	Attendance team with Director, counselors, family services, and social worker as needed.
Complete when	The family has received the required outreach, the barrier is identified when possible, and the next action is assigned.

◆ ADULT OPERATING SEQUENCE

- 1 Review absence data daily and identify students approaching thresholds.
- 2 Verify that required outreach occurred.
- 3 Ask whether absence appears willful or barrier-based.
- 4 Route transportation, housing, medical, safety, or family barriers to the correct support.
- 5 Use letters, calls, ParentSquare, email, home visits, and meetings according to the threshold pathway.
- 6 Create Attendance Success Agreements when family engagement has occurred and improvement requires a formal plan.
- 7 Document every step and review progress weekly.

◆ STUDENT EXPERIENCE

Students and families experience attendance support as problem-solving before enforcement.

◆ FAMILY COMMUNICATION

Communication is warm, direct, and barrier-seeking. It should ask what is preventing attendance and what support is needed.

◆ DOCUMENTATION

PowerSchool or the required system records contacts, meetings, letters, home visits, agreements, and next steps.

EQUITY CHECK

Do not treat housing instability, transportation barriers, medical concerns, caregiving instability, or language barriers as willful noncompliance.

5.8 RESPOND TO WELLNESS AND SAFETY CONCERNS

Wellness and safety concerns require immediate routing, supervision, documentation, and family communication according to required procedures.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use when a student shows signs of self-harm, suicidal ideation, threat to others, serious dysregulation, safety risk, or crisis-level concern.
Primary adult owner	Counselor, Director, administrator, and safety team as defined by the concern.
Complete when	The student is supervised, routed, assessed or supported according to procedure, and follow-up is scheduled.

◆ ADULT OPERATING SEQUENCE

- 1 Keep the student supervised and calm.
- 2 Notify the designated counselor and administrator immediately.
- 3 Do not leave the student alone when self-harm or suicidal ideation is suspected.
- 4 Gather initial facts without interrogation.
- 5 Follow the required screening, threat assessment, safety plan, or emergency response process.
- 6 Notify parent/guardian according to required procedures.
- 7 Document within the required timeline and protect confidentiality.

◆ STUDENT EXPERIENCE

Students experience immediate adult protection, calm supervision, and appropriate support rather than public exposure or interrogation.

◆ FAMILY COMMUNICATION

Parent/guardian notification follows required procedures and occurs the same day when required by the concern.

◆ DOCUMENTATION

Safety and wellness documentation must be factual, timely, confidential, and stored in the required location.

EQUITY CHECK

Share only what staff need to know to keep the student safe and supported. Do not turn student crisis into broad staff narrative.

5.9 USE DCS AND MANDATED REPORTING PATHWAY

Suspected abuse, neglect, or educational neglect must be routed immediately through the required reporting process.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use when any staff member suspects abuse, neglect, or a reportable safety concern.
Primary adult owner	Any employee has responsibility to act; counselor or designated staff may coordinate campus process according to current procedures.
Complete when	The concern has been routed, reported when required, documented, and followed up through the correct adult owner.

◆ ADULT OPERATING SEQUENCE

- 1 Prioritize student safety.

- 2 Notify the designated counselor or administrator immediately according to school process.
- 3 Do not investigate beyond what is needed for safety and reporting.
- 4 Make or support the report according to current mandated reporting requirements.
- 5 Document required school actions and communications.
- 6 Protect student confidentiality.
- 7 Follow up only through appropriate channels.

◆ STUDENT EXPERIENCE

Students experience protection and calm support, not adult disbelief, gossip, or interrogation.

◆ FAMILY COMMUNICATION

Family communication must follow safety and reporting guidance. Do not notify a family in a way that increases risk to the student.

◆ DOCUMENTATION

Document reporting steps and outcomes only in the approved restricted location.

EQUITY CHECK

Bias can affect which families are suspected or believed. Use objective facts and mandated-reporting standards, not assumptions about poverty, race, family structure, culture, or language.

5.10 RESPOND TO TITLE IX OR PROTECTED-STATUS CONCERNS

Concerns involving sex-based discrimination, harassment, sexual misconduct, retaliation, or other protected-status issues require immediate routing to the designated administrator or coordinator.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use when a complaint, disclosure, report, rumor, or observed incident may involve Title IX or protected-status concerns.
Primary adult owner	Designated Title IX coordinator or administrator; staff report immediately.
Complete when	The concern is routed to the correct process, immediate safety is addressed, and required documentation is started.

◆ ADULT OPERATING SEQUENCE

- 1 Receive the report without promising an outcome.
- 2 Keep students safe and separate when needed.
- 3 Notify the designated administrator or coordinator immediately.
- 4 Document the intake factually.
- 5 Avoid informal investigation by staff who are not assigned to the process.
- 6 Provide supportive measures as directed.
- 7 Follow required notice, investigation, outcome, and recordkeeping procedures.

◆ STUDENT EXPERIENCE

Students experience protection, neutrality, and support without public exposure or retaliation.

◆ FAMILY COMMUNICATION

Family communication follows the required process and should be coordinated by the designated lead.

◆ DOCUMENTATION

Records are maintained according to required procedures and confidentiality rules.

EQUITY CHECK

Adults must not dismiss concerns because students are young, because language is unclear, or because the involved students have prior behavior histories.

5.11 SUPPORT STUDENTS EXPERIENCING HOMELESSNESS OR FOSTER CARE

Students experiencing homelessness or foster care require immediate access, stability supports, transportation coordination, and barrier removal.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use when enrollment, attendance, family communication, student disclosure, or staff observation suggests housing instability or foster care involvement.
Primary adult owner	Director, social worker, family services, front office, and district liaison as appropriate.
Complete when	The student has access, assigned support, transportation/resource follow-up when needed, and a next check-in.

◆ ADULT OPERATING SEQUENCE

- 1 Enroll or maintain school access without unnecessary delay.
- 2 Notify the designated liaison or social worker within the required timeframe.
- 3 Assess barriers related to transportation, documents, housing, supplies, attendance, and communication.
- 4 Coordinate family resource support through the appropriate staff member.
- 5 Monitor attendance and academic stability.
- 6 Protect privacy and avoid public identification.
- 7 Document supports and follow-up in the required system.

◆ STUDENT EXPERIENCE

Students experience school as a stable point of connection rather than another barrier.

◆ FAMILY COMMUNICATION

Family communication should be respectful, resource-oriented, and free of stigma.

◆ DOCUMENTATION

Document eligibility, services, communication, transportation requests, and follow-up in appropriate systems.

EQUITY CHECK

Do not delay instruction or enrollment because documents, transportation, or housing status are unresolved.

5.12 COORDINATE ASPIRE AND COMMUNITY SUPPORTS

Community partners strengthen school-based support when students require counseling, behavior planning, family resources, or intensive services.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use when a student’s support plan requires services beyond school-based universal or targeted intervention.
Primary adult owner	Director, counselor, family services, Aspire contact, or community partner lead.
Complete when	The partner connection is active, tracked, and reviewed.

◆ ADULT OPERATING SEQUENCE

- 1 Determine whether the need requires a community partner referral.
- 2 Obtain required family consent before referral when needed.
- 3 Share only relevant information through appropriate channels.

- 4 Include partner input in student support meetings when appropriate.
- 5 Track active referrals and follow-up dates.
- 6 Review whether the support is improving access, safety, attendance, or regulation.
- 7 Close or revise the referral when goals are met or needs change.

◆ STUDENT EXPERIENCE

Students and families receive coordinated support rather than multiple disconnected adult requests.

◆ FAMILY COMMUNICATION

Families receive clear explanation of what the partner provides, what consent means, and who the school contact is.

◆ DOCUMENTATION

Referral status, consent, meeting notes, and follow-up are documented in the appropriate restricted system.

EQUITY CHECK

Community partnership should reduce barriers and strengthen dignity. Do not use partner referral as a way to remove responsibility from school-based adults.

5.13 USE OSS, DUE PROCESS, EXPULSION, AND ALTERNATIVE PLACEMENT PATHWAYS

Exclusionary responses require careful review, required notices, due process, student rights protections, and continued attention to access and re-entry.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use when behavior may require out-of-school suspension, expulsion consideration, alternative placement, MDR, or official disciplinary action.
Primary adult owner	Head of School or designated administrator with Director, special education team, and required district contacts as applicable.
Complete when	The required process is complete, academic access is addressed, and a re-entry plan exists.

◆ ADULT OPERATING SEQUENCE

- 1 Review the incident facts and immediate safety needs.
- 2 Confirm required prior supports and documentation unless the incident requires immediate action.
- 3 Check disability, IEP, 504, and special-population status before action proceeds.
- 4 Provide required notice and due process steps.
- 5 Maintain academic access as required.
- 6 Plan re-entry before the student returns.
- 7 Document all decisions, communications, and required meetings.

◆ STUDENT EXPERIENCE

Students experience formal discipline with rights protected, access considered, and re-entry planned.

◆ FAMILY COMMUNICATION

Family communication follows required timelines and includes rights, next steps, and support expectations.

◆ DOCUMENTATION

Official records, notices, hearing documents, MDR records, and re-entry plans are maintained according to required procedures.

EQUITY CHECK

Exclusionary action must not substitute for support planning. Review disproportionality and ensure disability-related protections are followed.

5.14 RESPOND TO MISSING STUDENT OR WITHDRAWAL CONCERNS

Missing student and withdrawal concerns require immediate action, accurate records, and escalation when a student’s location or enrollment destination is uncertain.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use when a student is unaccounted for during the school day, a family requests withdrawal, or the student’s next school placement is unconfirmed.
Primary adult owner	Front office, administrator, Director, attendance team, and required safety contacts.
Complete when	The student is located or escalated, or the withdrawal destination is confirmed and recorded.

◆ ADULT OPERATING SEQUENCE

- 1 For a missing student, notify leadership and front office immediately.
- 2 Initiate the in-building search and assign staff to specific areas.
- 3 If the student is not located within the required time window, contact parent/guardian and law enforcement according to procedure.
- 4 Document timeline, actions, and outcome.
- 5 For withdrawal, confirm destination, records transfer, and required forms.
- 6 If destination is unknown, assign follow-up and escalate according to procedure.
- 7 Review the case for any attendance, safety, housing, or wellness implications.

◆ STUDENT EXPERIENCE

Students are located quickly and withdrawal processes do not allow students to disappear from educational access.

◆ FAMILY COMMUNICATION

Family communication is immediate for missing student concerns and clear for withdrawal/destination questions.

◆ DOCUMENTATION

Document timelines, contact attempts, enrollment destination, forms, and follow-up actions.

EQUITY CHECK

Unknown destination, housing instability, or repeated moves should prompt support review, not assumption of family negligence.

PART 6

GOVERN, COACH, AND IMPROVE

PART PURPOSE

Keep the culture system consistent through leadership cadence, coaching, data review, documentation quality, implementation checks, and annual maintenance.

Culture systems fail when adults improvise independently. Governance does not mean bureaucracy. It means the school has a predictable rhythm for noticing patterns, making decisions, assigning owners, coaching adult practice, protecting records, and improving implementation over time.

◆ THIS PART CONTROLS:

- ◆ Daily, weekly, monthly, quarterly, and annual leadership cadence.
- ◆ Culture/MTSS meeting protocol and decision logs.
- ◆ SRR/R3 coaching and adult practice support.
- ◆ LiveSchool, GiveThx, attendance, restorative, and documentation data review.
- ◆ Documentation QA, privacy, staff training, and system maintenance.

OPERATING STANDARD

A meeting that does not produce an owner, action, due date, and review date is a discussion, not an operating decision.

6.1 RUN THE DAILY CULTURE OPERATING RHYTHM

Daily rhythm keeps culture work preventive instead of reactive.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use every school day.
Primary adult owner	Director, Dean, counselors, attendance team, restorative team, and leadership.
Complete when	Urgent items are closed or assigned before adults leave for the day.

◆ ADULT OPERATING SEQUENCE

- 1

Begin the day by reviewing attendance, prior-day incidents, active safety/wellness concerns, urgent family follow-up, and students needing proactive check-in.
- 2

Use arrival to observe belonging, regulation, and early warning signs.
- 3

At midday, check DBRC completion, restorative support patterns, attendance contacts, and urgent student needs.
- 4

Before dismissal, close urgent documentation and assign next-day follow-up.
- 5

Use brief adult huddles when patterns require same-day adjustment.

◆ STUDENT EXPERIENCE

Students experience adults who anticipate needs rather than wait for crisis.

◆ FAMILY COMMUNICATION

Families receive timely communication when a same-day concern or support step requires it.

◆ DOCUMENTATION

Daily notes and urgent documentation are completed in the appropriate systems within required timelines.

EQUITY CHECK

Review whether daily adult attention repeatedly goes only to the loudest crises while quieter students become invisible.

6.2 RUN WEEKLY CULTURE/MTSS MEETING

The weekly Culture/MTSS meeting is the adult decision table for Tier 1, Tier 2, Tier 3, attendance, restorative patterns, wellness, and documentation gaps.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use weekly and whenever an urgent pattern requires team review.
Primary adult owner	Director or designated culture lead facilitates; team members bring required data.
Complete when	Every reviewed student or system concern has a decision or a clearly assigned next data step.

◆ ADULT OPERATING SEQUENCE

- 1 Open with the clearest data truth from the week.
- 2 Name patterns before naming solutions.
- 3 Review Tier 1 gates, DBRC/CICO, Tier 3 supports, attendance, restorative visits, safety/wellness concerns, and documentation gaps.
- 4 Decide continue, revise, intensify, fade, close, or route through another required procedure.
- 5 Assign one owner for each action.
- 6 Record due date and next review date.
- 7 Close with one adult practice focus for the next week.

◆ STUDENT EXPERIENCE

Students experience coordinated adult support instead of disconnected responses.

◆ FAMILY COMMUNICATION

Family communication required by any decision is assigned before the meeting ends.

◆ DOCUMENTATION

Maintain a decision log with owner, action, due date, data source, family contact status, and review date.

EQUITY CHECK

The meeting must review adult practice and system conditions, not only student behavior.

6.3 USE CULTURE DEEP-DIVE

Culture Deep-Dive helps leaders diagnose schoolwide implementation patterns and decide what to reteach, coach, repair, or redesign.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use monthly, after major culture shifts, or when multiple data sources show a pattern.
Primary adult owner	Leadership team with culture lead.
Complete when	The team has an implementation adjustment and a review date.

◆ ADULT OPERATING SEQUENCE

- 1 Select one focus area: routine, space, grade band, student group, adult practice, platform data, or support pathway.
- 2 Review observation, LiveSchool, GiveThx, attendance, restorative, referral, and family communication data as relevant.
- 3 Identify whether the primary issue is teaching, reinforcement, response, support, or governance.
- 4 Name the adult practice change.
- 5 Plan the reteach, coaching, or system adjustment.
- 6 Assign owners and dates.

7 Review impact in the next data cycle.

◆ **STUDENT EXPERIENCE**

Students experience improved consistency because leaders adjust the system, not just individual students.

◆ **FAMILY COMMUNICATION**

Family communication may be used when the Deep-Dive identifies a need for grade-level or schoolwide clarity.

◆ **DOCUMENTATION**

Deep-Dive notes should name pattern, adult action, owner, date, and impact measure.

EQUITY CHECK

Disaggregate where possible. A schoolwide average can hide disproportionality, invisibility, or specific adult practice concerns.

6.4 COACH ADULT PRACTICE USING SRR/R3

Coaching keeps the culture system alive by helping adults practice the moves students need them to use consistently.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use during walkthroughs, debriefs, staff meetings, observation cycles, and individual coaching.
Primary adult owner	Leaders and coaches; adults own implementation.
Complete when	The adult has one clear practice move and a follow-up date.

◆ **ADULT OPERATING SEQUENCE**

1 Observe the adult move, not only student behavior.

- 2 Identify the routine, response, relationship, or repair practice that needs strengthening.
- 3 Name one high-leverage action step.
- 4 Model or script the move when needed.
- 5 Practice the move in a low-pressure setting.
- 6 Observe again and give precise feedback.
- 7 Connect coaching data to culture patterns.

◆ STUDENT EXPERIENCE

Students experience more consistent adult behavior across rooms and settings.

◆ FAMILY COMMUNICATION

Family communication is not part of routine staff coaching unless a student support decision requires it.

◆ DOCUMENTATION

Coaching notes focus on adult practice, action step, and follow-up, not unnecessary student narrative.

EQUITY CHECK

Coaching should support adults without blaming students for adult inconsistency. Staff should be held accountable and supported to improve.

6.5 REVIEW PLATFORM AND CULTURE DATA

Data should clarify the next adult action and reveal whether the culture system is working equitably.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use weekly for active support decisions and monthly for broader system review.
Primary adult owner	Culture leadership, MTSS team, and administrators.
Complete when	The team identifies one or more adult actions and monitors whether the pattern changes.

◆ ADULT OPERATING SEQUENCE

- 1 Review LiveSchool positives, corrections, rewards, referrals, and House points.
- 2 Review GiveThx giving, receiving, and belonging patterns.
- 3 Review restorative room visits, reset frequency, re-entry success, attendance, DBRC/CICO progress, and official records.
- 4 Look by setting, adult, time, grade, and student group when available.
- 5 Identify adult practice changes before adding student consequences.
- 6 Assign follow-up and review impact.

◆ STUDENT EXPERIENCE

Students experience a system that notices patterns and improves rather than repeating ineffective responses.

◆ FAMILY COMMUNICATION

Family communication follows from student-specific decisions or schoolwide clarity needs.

◆ DOCUMENTATION

Data review is documented through meeting notes, decision logs, dashboards, or QA tools.

EQUITY CHECK

Data can reproduce bias if adults enter biased records. Review both the numbers and the language adults use.

6.6 MAINTAIN DOCUMENTATION QUALITY

High-quality documentation protects students, families, staff, and the school by creating an accurate record of support and decisions.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use for behavior events, attendance actions, family communication, meetings, safety/wellness concerns, tier movement, re-entry, and official procedures.
Primary adult owner	Every adult documents their assigned actions; leaders audit quality.
Complete when	The record answers what happened, what adults did, what communication occurred, and what comes next.

◆ ADULT OPERATING SEQUENCE

- 1 Document within required timelines.
- 2 Write observable facts and adult actions.
- 3 Include what support was provided, not only what behavior occurred.
- 4 Record family communication, outcomes, and next steps.
- 5 Avoid opinions, diagnosis, motive, sarcasm, exaggeration, and unnecessary narrative.
- 6 Use the correct system for the record type.
- 7 Audit documentation weekly and correct gaps.

◆ STUDENT EXPERIENCE

Students benefit from accurate support history rather than adult memory or rumor.

◆ FAMILY COMMUNICATION

Family-facing records should be factual, professional, and partnership-oriented.

◆ DOCUMENTATION

PowerSchool, LiveSchool, trackers, restricted records, and meeting logs are used according to their purpose.

EQUITY CHECK

Review documentation language for bias. Words like defiant, aggressive, disrespectful, manipulative, or attention-seeking require observable facts or should be replaced.

6.7 PROTECT PRIVACY AND NEED-TO-KNOW INFORMATION

Privacy is part of culture. Student stories are not training props and sensitive records must be protected.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use whenever sharing student information, training staff, preparing packets, discussing cases, or storing records.
Primary adult owner	All adults; leaders own systems and access expectations.
Complete when	Information is shared only with appropriate adults and stored in the correct location.

◆ ADULT OPERATING SEQUENCE

- 1

Share only what the receiving adult needs to know to support the student or fulfill a required role.
- 2

Use blank or sanitized tools for training.
- 3

Store completed DBRCs, behavior plans, safety records, DCS notes, Title IX records, wellness information, and case details in restricted locations.
- 4

Avoid student names and case narratives in broad staff materials.
- 5

Use private meeting spaces for student-specific conversations.

6 Ask a leader when unsure whether information should be shared.

◆ **STUDENT EXPERIENCE**

Students experience dignity and confidentiality even when receiving intensive support.

◆ **FAMILY COMMUNICATION**

Families should be able to trust that their child’s support information is handled professionally.

◆ **DOCUMENTATION**

Privacy-sensitive documentation remains in approved restricted locations.

EQUITY CHECK

Do not normalize storytelling about students as staff culture. Adult frustration does not create a right to share private student information.

6.8 MAINTAIN THE ANNUAL CULTURE SYSTEM

Annual maintenance ensures culture systems are ready before staff and students are asked to use them.

OPERATING ELEMENT	CAMPUS STANDARD
When this procedure is used	Use before the school year, mid-year, and end-of-year.
Primary adult owner	Culture leadership with operations, counselors, deans, teachers, and support teams.
Complete when	The school year opens with owners, tools, platforms, schedules, and procedures ready.

◆ **ADULT OPERATING SEQUENCE**

1 Before school starts, confirm roles, platform setup, schedules, training, forms, contacts, and meeting cadence.

- 2 At launch, train adults on core expectations, response sequence, documentation, and family communication.
- 3 At mid-year, review data, reteach routines, refresh platform categories, and adjust support cycles.
- 4 At end-of-year, close or transition active cases, archive records, update tools, and identify summer revisions.
- 5 Prepare transition notes for students needing continued support.
- 6 Schedule next-year training and system review.

◆ STUDENT EXPERIENCE

Students enter a system that is ready, consistent, and predictable from the first day.

◆ FAMILY COMMUNICATION

Families receive updated expectations, platform information, and support contact information at the appropriate time.

◆ DOCUMENTATION

Annual checklists, training records, system updates, and transition plans are stored in the appropriate locations.

EQUITY CHECK

Annual maintenance should include equity data from the prior year so the school does not restart the same disproportional patterns.

APPENDIX A

TEACHER QUICK GUIDES

These tools are written for quick adult use during planning, coaching, and real-time response. They are not substitutes for the procedures in the manual.

10-SECOND CORRECTION

Proximity. Name the routine. Give the next step. Walk away when the student has a path back. Scan for follow-through. Repair later if needed.

MOMENT	ADULT MOVE	LANGUAGE EXAMPLE
Off task	Use proximity or a quiet cue.	"Your next step is question two."
Routine drift	Name the routine, not the child.	"Hallway is silent and forward-facing. Reset at the line."
Escalation beginning	Shorten language and lower intensity.	"Pause. Breathe. Choose seat or reset."
Return from reset	Give a clean re-entry.	"Welcome back. Start with the first problem. I will check in two minutes."
Repair needed	Wait for regulation first.	"We will talk privately after both of us are ready."

TEACHER CHECKLIST BEFORE TIER 2 CONSIDERATION

- ◆ Expectation taught or retaught in the relevant setting.
- ◆ Classroom interventions attempted and noted.
- ◆ Family contact made early as partnership.

- ◆ Behavior documented factually.

- ◆ Routine, task, access, and adult response reviewed.

- ◆ Tier 1 checklist submitted for team review when pattern persists.

APPENDIX B

STUDENT SUPPORT TOOLS

Student-facing tools should be brief, age-appropriate, and connected to the culture language students already know.

TOOL	USE	STUDENT-FRIENDLY FRAME
Daily Check-In	Used for CICO/DBRC, mentor support, and morning regulation.	"What goal am I practicing today, and what support do I need?"
Daily Check-Out	Used to review what worked and what strategy comes next.	"What went well, what was hard, and what can I try tomorrow?"
Restorative Reflection	Used after regulation when harm or disruption needs repair.	"What happened, who was affected, and what can I do to repair?"
Re-Entry Plan	Used before returning after reset, RRC, OSS, or safety absence.	"What is my next step when I return? Who will help me?"

STUDENT-FACING REPAIR STEMS

I was trying to _____. The impact was _____. Next time I can _____. The support I need is _____. To repair, I will _____.

APPENDIX C

FAMILY COMMUNICATION LANGUAGE

Family communication should be warm, direct, factual, and support-oriented. It should tell families what was observed, what the school has tried, what the next support is, and how the family can partner.

SITUATION	PROFESSIONAL FAMILY LANGUAGE
Positive recognition	"I wanted to share specific evidence of your child living our Safe, Respectful, Responsible expectations today..."
Early pattern	"We are noticing a pattern and want to partner early before it becomes bigger. Here is what we have taught and what we are trying next..."
DBRC/CICO start	"This is a support tool for daily feedback and adult connection. It is not a punishment. We will review progress together..."
Restorative support	"Your child received support to regulate, reflect, and return to learning. We are focused on the skill needed for next time..."
Re-entry	"Before your child returns to the next setting, we are making sure the expectation, support, and repair step are clear..."

FAMILY PARTNERSHIP STANDARD

Family availability should not become a barrier to student access to instruction. When immediate family meeting is not possible, the school creates a provisional support and re-entry plan, documents contact attempts, and schedules the family conversation as soon as possible.

APPENDIX D

ADMINISTRATOR AND MTSS TOOLS

Administrative tools should make decisions visible, timely, and follow-up ready.

MEETING ITEM	DECISION REQUIRED
Tier 1 pattern	Continue Tier 1, reteach routine, coach adult practice, or refer to Tier 2 review.
Tier 2 DBRC/CICO	Continue, revise goal, change mentor, fade, exit, or intensify.
Tier 3 support	Revise plan, add partner, consider FBA/BIP, update safety plan, or reduce support.
Attendance	Barrier support, family contact, home visit, success agreement, or required referral pathway.
Restorative data	Reteach routine, coach adult response, review high-use student, or adjust reset process.
Documentation QA	Correct missing records, coach language, update tracker, or close item.

WEEKLY DECISION LOG MINIMUM FIELDS

- ◆ Student or system focus
- ◆ Observed pattern
- ◆ Current support level
- ◆ Decision made
- ◆ Owner
- ◆ Family communication status
- ◆ Documentation needed

◆ Due date

◆ Next review date

APPENDIX E

PLATFORM USE GUIDE

Platforms support the culture system. They do not replace adult judgment, relationship, regulation, repair, required records, or due process.

TOOL	PRIMARY MATCHBOOK FUNCTION	USE WITH CARE
LiveSchool	Points, Houses, rewards, behavior evidence, family visibility, recognition economy, culture data.	Do not let points replace teaching or repair. Enter behavior evidence after stabilization.
GiveThx	Gratitude, belonging, peer appreciation, staff appreciation, relationship data.	Do not use appreciation data for discipline. Watch for social invisibility.
PowerSchool / official system	Formal records, attendance, required behavior documentation, meetings, official notes.	Write only factual, professional, necessary information.
ParentSquare / communication tools	Family communication, outreach, reminders, partnership messages.	Document significant contacts in the required official record.
Manual tools/forms	Repair, re-entry, DBRC, attendance agreements, meeting notes, coaching, checklists.	Use blank tools for training; protect completed student records.

APPENDIX F

DOCUMENTATION STANDARD

Documentation is evidence of care only when it is factual, timely, professional, and connected to the support provided.

WRITE	DO NOT WRITE
Observable behavior: what happened, where, when, who responded.	Labels, speculation, motive, diagnosis, sarcasm, or emotional commentary.
Adult support provided and sequence of actions.	Only the behavior with no record of adult response.
Student response and next step.	Character judgments or predictions about future behavior.
Family communication and outcome.	Unverified statements or sensitive family assumptions.
Review date or assigned owner when follow-up is needed.	Open-ended notes with no next step for an active concern.

DOCUMENTATION SENTENCE FRAME

Observed: ____ Adult response: ____ Student response: ____ Family communication: ____
Next step: ____ Review date/owner: ____

APPENDIX G

RESTORATIVE RESPONSE QUICK REFERENCE

Use this page when adults need to remember the sequence quickly.

STEP	ADULT QUESTION	ACTION
Notice	What changed?	Identify early signs before escalation.
Regulate	Am I calm enough to help?	Lower adult intensity and shorten language.
Diagnose	Is this rigor, access, regulation, or safety?	Match support to the need.
Redirect/Reteach	Can this stay in the room?	Use least-invasive response first.
Reset	Does the student need a pause?	Use in-class or supported reset.
Repair	Who was affected and what needs restoration?	Hold private repair after regulation.
Re-enter	What is the next safe, respectful, responsible step?	Return with a clear plan.
Document	What support happened?	Record facts, adult response, family contact, and next step when required.
Review	Is this a pattern?	Bring repeated concerns to team review.

APPENDIX H

ANNUAL CULTURE SYSTEM CHECKLIST

Use this checklist before launch, at mid-year, and during end-of-year closeout.

BEFORE SCHOOL STARTS

- ◆ Confirm adult roles and decision rights.
- ◆ Set weekly culture/MTSS meeting cadence.
- ◆ Update platform categories, House rosters, and recognition cycles.
- ◆ Prepare Culture Camp, First Five, and Morning Meeting materials.
- ◆ Train staff on restorative response sequence and documentation.
- ◆ Confirm safety, wellness, attendance, Title IX, DCS, and special-population contacts.

MID-YEAR

- ◆ Review recognition, correction, attendance, restorative, and tier data.
- ◆ Reteach routines that have drifted.
- ◆ Refresh staff calibration on correction, reset, repair, and documentation.
- ◆ Review active Tier 2/Tier 3 cases and transition plans.
- ◆ Communicate any schoolwide culture reset to families.

END-OF-YEAR

- ◆ Close, transition, or archive active support plans.
- ◆ Complete documentation QA.
- ◆ Review equity and disproportionality data.

- ◆ Update tools and training needs.

- ◆ Prepare transition notes for students requiring continued support.

- ◆ Plan summer revisions and next-year launch.

APPENDIX I

GLOSSARY OF OPERATING TERMS

This glossary is for staff clarity and consistent language.

TERM	MEANING IN THIS MANUAL
Culture Promise	The shared adult commitment to teach, reinforce, repair, protect, and improve Safe, Respectful, Responsible culture.
In-Class Reset	A brief regulation option that keeps the student in the classroom community when safe.
Supported Reset	A temporary staffed support outside the immediate classroom pressure when needed for regulation or safety.
Restorative Re-Entry Center	A structured support setting for extended regulation, accountability, academic access, repair, and re-entry. Official systems may use required discipline codes when applicable.
DBRC	Daily Behavior Report Card; a feedback and progress-monitoring tool, not a punishment.
CICO	Check-In/Check-Out; a daily adult connection and feedback structure.
FBA/BIP	Function-based assessment and intervention plan used when data indicates deeper behavior analysis and support are needed.
Culture Deep-Dive	A leadership review of culture data, adult practice, routines, and system patterns.
Equity Check	A required review of whether the adult response, data, or procedure creates bias, disproportionality, invisibility, or access barriers.

CLOSING STANDARD

The strength of Matchbook culture is not measured by whether adults can name the values. It is measured by whether students experience those values consistently when they enter the building, move through routines, make mistakes, receive recognition, need help, repair harm, return to learning, and grow over time.

FINAL OPERATING SENTENCE

Matchbook adults teach expectations before correction, reinforce belonging with evidence, respond to behavior with dignity, repair harm after regulation, intensify support when students need more, protect rights through required procedures, and improve the system through coaching and data review.
